

ODIN

Orchestrated Decision Intelligence Network

Everything it can do for a 1-3 person shop, explained in plain English

How to read this document

READY NOW

Working today. We can switch it on for your shop immediately.

QUICK BUILD

A short add-on we build for you, using parts that already exist.

Prepared by Brock Shue · Shue Box LLC · May 30, 2026

What is ODIN?

ODIN is software that runs in the background of your business 24 hours a day. Think of it as a full-time office manager who never sleeps, never forgets a follow-up, and never takes a sick day. It keeps your jobs organized, watches your money, writes your quotes, chases down old customers, and answers leads the moment they come in - so you can stay on the tools and still grow.

How you use it

You talk to ODIN by text or a simple web app - plain English, no learning curve. Say "who haven't I followed up with?", "what did I spend on parts this month?", "text the Johnson quote" - and it handles it. Everything else runs automatically in the background whether you're on a roof, under a crawlspace, or at your kid's game.

What it is NOT

It is not ServiceTitan or Housecall Pro. Those tools cost \$300-500/month and are built for large crews. ODIN is lighter, cheaper, and AI-native - built specifically for the 1-3 person shop that needs automation without the overhead.

The core promise: you stay on the tools.

ODIN handles the phone calls you miss, the quotes you forget to send, the customers you mean to follow up with, and the money details you don't have time to track.

SECTION 1 - STAY ORGANIZED

Job Board

[READY NOW](#)

Every job moves through clear stages: New Lead, Quoted, Scheduled, In Progress, Done, Paid. You see every job's status at a glance from your phone.

↳ *Why it matters: Nothing falls through the cracks. You always know exactly where every job stands without calling around or digging through a notepad.*

Customer History

[READY NOW](#)

ODIN stores every customer's equipment model, install date, last service, warranty expiry, and your personal notes. Pull it up before you knock on any door.

↳ *Why it matters: You show up knowing their system. Customers notice - and they stay loyal to the contractor who remembers them.*

Follow-Up Queue

[READY NOW](#)

ODIN tracks every open quote, missed callback, and pending job. It reminds you automatically - or follows up for you - so nothing gets dropped.

↳ *Why it matters: Forgetting to follow up is the single biggest way small shops lose revenue. ODIN never forgets.*

Daily Briefing

[READY NOW](#)

Every morning ODIN sends a simple rundown: today's jobs with addresses and customer notes, anything urgent, and what needs attention.

↳ *Why it matters: Start every day with a clear plan instead of scrambling to remember who called yesterday.*

Task Delegation

[READY NOW](#)

Assign tasks to yourself, a helper, or ODIN with a simple text. ODIN tracks completion and reminds when things are overdue.

↳ *Why it matters: If you ever bring on a part-time helper, ODIN becomes their to-do list and accountability system automatically.*

SECTION 2 - TRACK YOUR MONEY

Account Balances

[READY NOW](#)

ODIN connects securely to your bank (read-only - it can never move money) and shows all your balances in one place on demand.

↳ *Why it matters: Know what you actually have right now without logging into multiple apps or waiting for a statement.*

Spending Breakdown

[READY NOW](#)

Automatically sorts your spending into categories: fuel, parts, tools, insurance, subs. View it by week, month, or year-to-date with a single message.

↳ *Why it matters: See where the money is going. Most owners are surprised by two or three categories they had no idea were that high.*

Subscription Watch

[READY NOW](#)

ODIN scans every recurring charge hitting your accounts and lists them all in one place - name, amount, billing date.

↳ *Why it matters: The average small business owner pays for 3-4 subscriptions they forgot about. ODIN finds them.*

Profit Per Job Type

[QUICK BUILD](#)

Tracks revenue minus parts and labor costs on each job so you can see what each type of work actually nets you.

↳ *Why it matters: Learn which jobs make real money and which ones eat your time for thin margins - then shift what you take on.*

Tax Set-Aside Tracker

[QUICK BUILD](#)

As money comes in, ODIN calculates and reminds you how much to set aside for quarterly taxes based on your actual income.

↳ *Why it matters: No more scrambling in April. The money is already waiting.*

Weekly Revenue Scorecard

[READY NOW](#)

A simple weekly number: jobs completed, total revenue, average ticket, compare to last week and last month.

↳ *Why it matters: You run a real business. See it like one.*

SECTION 3 - WIN MORE QUOTES

Instant Quote Drafter

[QUICK BUILD](#)

Text ODIN a few job details from the truck - unit size, type of work, location, condition - and it writes a clean, professional quote in under 60 seconds.

↳ *Why it matters: Quote on-site instead of at your kitchen table at 9 PM. Faster quotes close faster.*

Good / Better / Best Pricing

[QUICK BUILD](#)

Every quote comes back structured as three options automatically: basic fix, recommended solution, and premium option.

↳ *Why it matters: Customers almost always pick the middle. This one change alone typically raises average ticket value 20-40% with zero extra selling.*

Quote Follow-Up Automation

[READY NOW](#)

If a quote is not accepted within 48 hours, ODIN automatically sends a friendly check-in on day 2 and again on day 5.

↳ *Why it matters: Most small-shop quotes die from silence. This sequence recovers 15-25% of quotes that would otherwise be lost.*

Professional Branded Look

[READY NOW](#)

Every quote, email, and text goes out clean and consistent with your shop name. No more copying and pasting from old texts.

↳ *Why it matters: Look like the established shop even as a 2-person crew.*

SECTION 4 - GROW YOUR BUSINESS

Seasonal Maintenance Plan Engine

[QUICK BUILD](#)

ODIN automatically reaches out to your past customers each spring (AC tune-up) and each fall (furnace check) with a simple, personal-feeling message.

↳ *Why it matters: This is the single highest-ROI move in HVAC. It converts one-time customers into recurring revenue and fills your slow months before they happen.*

Google Review Requests

[READY NOW](#)

After every completed job, ODIN sends a friendly text: "How did we do? A quick review means the world to us." with your Google link.

↳ *Why it matters: 1-3 man shops live and die on reviews. A consistent review engine is the single most reliable way to grow calls without spending on ads.*

Win Back Old Customers

[READY NOW](#)

ODIN identifies customers you have not contacted in 12+ months and sends them a warm check-in - no cold feel, just a natural reconnect.

↳ *Why it matters: Your old customer list is free revenue. Most shops never touch it.*

Referral Requests

[QUICK BUILD](#)

After a positive review or a completed job, ODIN asks the customer if they know anyone else who needs HVAC work.

↳ *Why it matters: Referred customers close faster, complain less, and refer more. The cheapest lead you will ever get.*

Owner KPI Scorecard

[READY NOW](#)

Simple weekly numbers texted to you: jobs done, revenue, average ticket, close rate on quotes, new vs. returning customers.

↳ *Why it matters: Most small shop owners have never seen their own numbers clearly. Once you see them, you make better decisions automatically.*

Decision Support

[READY NOW](#)

When you face a business decision - hire a helper, buy a new van, expand to a new area - ODIN logs it, frames the options, and gives you a recommendation.

↳ *Why it matters: Stop making big decisions alone at midnight. Have a system that thinks through it with you.*

SECTION 5 - SCHEDULING AND INSTALLS

Smart Job Scheduling

[READY NOW](#)

Book jobs into your calendar with one text. ODIN blocks the right amount of time per job type and prevents double-booking.

↳ *Why it matters: No more missed appointments or showing up to two places at once.*

Job Prep and Materials List

[QUICK BUILD](#)

Before each install or major repair, ODIN generates the parts and tools list based on the job type so you leave the supply house with everything.

↳ *Why it matters: One fewer trip back to the supply house is an hour saved and a happier customer.*

Customer Prep Text

[READY NOW](#)

The morning of every install, ODIN automatically texts the customer: arrival window, what to clear, what to expect.

↳ *Why it matters: Smoother installs. Fewer "nobody told me" calls. Customers feel taken care of.*

Post-Install Wrap-Up

[READY NOW](#)

After a job is marked done, ODIN automatically fires a warranty reminder to the customer and a review request 24 hours later.

↳ *Why it matters: Every job closes the right way without you lifting a finger.*

SECTION 6 - REPAIRS AND DIAGNOSTICS

Repair Intake

[READY NOW](#)

When a repair call comes in, ODIN captures the problem description, urgency, customer address, and equipment info and slots it into your day.

↳ *Why it matters: Nothing gets lost between the voicemail and the truck.*

Diagnostic Knowledge Base

[QUICK BUILD](#)

Load your HVAC troubleshooting knowledge into ODIN - symptoms, likely causes, common fixes. You or a helper can look up any symptom on the way to a job.

↳ *Why it matters: Faster diagnosis on every call. Also the foundation of a training tool if you ever bring someone on.*

Parts Follow-Up Tracker

[READY NOW](#)

For jobs waiting on a part or a callback, ODIN tracks the open item and reminds you automatically so the customer never wonders where you went.

↳ *Why it matters: One of the top reasons small HVAC shops lose customers is silence while waiting on parts. This eliminates it.*

Repair to Maintenance Upsell

[QUICK BUILD](#)

After every repair, ODIN sends the customer a short message offering your seasonal maintenance plan so it never happens again.

↳ *Why it matters: Turns a one-time repair customer into a recurring plan customer. This is the growth loop.*

SECTION 7 - NEVER MISS A LEAD

Missed-Call Text-Back

[READY NOW](#)

The instant you miss a call, ODIN texts the caller back: "Hey, this is [Your Shop] - sorry we missed you, what can we help with?" in under 10 seconds.

↳ *Why it matters: A missed call is almost always a lost job - it goes to the next guy who picks up. This is the single fastest ROI of anything in this document.*

Instant Web / Facebook Lead Reply

[READY NOW](#)

Any lead that comes in through your website or Facebook gets a reply within seconds, day or night.

↳ *Why it matters: The first contractor to respond almost always gets the job. ODIN makes sure that is always you.*

After-Hours Coverage

[READY NOW](#)

When a lead comes in at 7 PM on a Saturday - "my AC just died" - ODIN responds immediately, captures the details, and books them for Monday.

↳ *Why it matters: You are at dinner. You still get the job. That is the whole point.*

SUMMARY

Ready to switch on for your shop today:

Job board \ Customer history \ Follow-up queue \ Daily briefing \ Task tracking \ Account balances \ Spending breakdown \ Subscription watch \ Weekly revenue scorecard \ Quote follow-up \ Branded quotes and emails \ Review requests \ Win-back old customers \ Owner KPI scorecard \ Decision support \ Smart scheduling \ Customer prep texts \ Post-install wrap-up \ Repair intake \ Parts follow-up \ Missed-call text-back \ Instant lead reply \ After-hours coverage

Quick builds tailored for your shop:

Instant quote drafter \ Good/Better/Best pricing \ Seasonal maintenance plan engine \ Profit per job type \ Tax set-aside tracker \ Job prep and materials list \ Diagnostic knowledge base \ Referral requests \ Repair-to-maintenance upsell

What you would need (it is simple)

A text number for your shop	We set it up for you. Takes about 10 minutes.
Read-only bank access	You stay in full control. ODIN can never move money, only read it.
Your email address	For sending quotes, follow-ups, and review requests.
30 minutes with us	We walk through how your shop runs today and configure everything around it.

What it costs you

As a case-study partner: nothing. We set it up for your shop at no charge. In exchange, we ask for honest feedback along the way and a short testimonial if you are happy with the results. That is the whole deal.

How we would roll it out

- 1 30-minute conversation to understand how your shop runs today.
- 2 Week 1: all the ready-now pieces switched on and tested.
- 3 Week 2: we build 1-2 custom pieces for your specific workflow (quote drafter + seasonal maintenance are the usual first picks).
- 4 You run it for a few weeks and give us real feedback.
- 5 We document the results together as a case study.

The bottom line:

ODIN's job is to catch the money your shop is already losing - missed calls, dead quotes, forgotten follow-ups, customers who drifted away - and put it back in your pocket, so you can stay on the tools and still grow.
